

HEENA JINDAL

Delhi, India | hjindal918@gmail.com | +91 9910963838 | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

OBJECTIVE

Third-year AI/ML undergraduate (CGPA 8.99/10) who has shipped three full-stack AI products — integrating LLMs, NLP, and computer vision into Flask/Next.js applications deployed on Vercel, Render, and Hugging Face Spaces. Strong foundation in Python and Data Structures & Algorithms (60+ LeetCode problems solved); currently deepening skills in Generative AI and agentic systems. Seeking a Software Engineering or AI/ML internship in Delhi NCR.

EDUCATION

Delhi Technical Campus (GGSIPU) — B.Tech, Artificial Intelligence & Machine Learning

2024 – 2028 | CGPA: 8.99/10

Sarvodaya Kanya Vidyalaya (CBSE) — Class XII | 89% | 2024

TECHNICAL SKILLS

- Languages: Python, JavaScript, TypeScript, SQL
- Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems
- AI/ML & Generative AI: Machine Learning, NLP, Computer Vision, LLMs (Llama 3.3 via Groq API), TF-IDF, Scikit-learn
- Web Development: Flask, Next.js, React.js, REST APIs
- Databases: SQLite, PostgreSQL, Supabase
- Tools & Platforms: Git, GitHub, Postman, Vercel, Render, Hugging Face Spaces

PROJECTS

MetroVerse — AI-Powered Smart Metro Navigation Platform

Python, Flask, Next.js, PostgreSQL, Supabase, Llama 3.3, Groq API

[Live Demo](#) | [GitHub](#)

- Engineered a full-stack metro navigation platform covering 250+ Delhi Metro stations using the official GTFS dataset
- Modeled the Delhi Metro as a weighted graph and implemented Dijkstra's Algorithm for shortest-path route planning
- Integrated Llama 3.3 via Groq API and developed 8+ REST APIs for AI-powered route assistance
- Designed a secure authentication system using Supabase Auth (email/password and Google OAuth) and deployed the application via Vercel and Render

Smart College Assistant — AI-Powered Campus Management System

Python, Flask, Next.js, Scikit-learn, OpenCV, SQLite

[GitHub](#)

- Developed a bilingual Hindi/English NLP chatbot trained on 500+ QA pairs using TF-IDF vectorization and a Voting Classifier
- Integrated 10+ campus modules (chatbot, attendance, marks, dashboard) into a unified Flask REST API backend
- Co-authored a research paper based on the project (under review for book-chapter publication)

VibeVerse — AI-Powered Student Wellness Platform

Python, Flask, SQLite, TextBlob, Spotify API

[Live Demo](#) | [GitHub](#)

- Developed an AI-powered wellness platform with real-time sentiment analysis using TextBlob for mood detection
- Engineered a mood-based music recommendation engine that surfaces personalized tracks via the Spotify API
- Deployed the application on Hugging Face Spaces and Vercel with session-based conversation storage

CERTIFICATIONS

- Tata GenAI Powered Data Analytics Job Simulation (Forage)
- Data to Web Bootcamp (Power BI & Flask)
- Internal Smart India Hackathon

LEADERSHIP & ACHIEVEMENTS

- Social Media Head, ACE DTC (2025 – Present) — managed LinkedIn and Instagram pages and promoted 2+ technical events
- Social Media Team Member, All IPU Community
- Participant, Smart India Hackathon (SIH) 2025 and Manthan Kriti Hackathon 2024; Volunteer, Manthan Kriti 2025
- Solved 60+ DSA problems on LeetCode, focused on Arrays, Strings, and Trees
- 6+ public GitHub repositories
